## Product Description

OPUS HE power systems are robust, free convection cooled, N+1 redundant backup power solutions for critical infrastructure applications such as transmission and distribution substations, process industries, railway signalling and substations and telecommunications.

OPUS HE Cabinet power systems consist of MHE rectifiers, VIDI+ controllers, Connections for mains and battery and load distribution MCB. System is configurable to match with requirements of the application. On top of 12 configurable relay alarms, system can be remotely monitored via modern communication protocols such as Ethernet TCP/IP, Modbus TCP/IP, SCADA IEC61850, SNMP and RS-232.

OC2066 2000x600x600mm standard cabinet systems deliver maximum 24 kW output power at 48, 60, 110, 125 and 220 VDC and 18 kW at 24 VDC output. Cabinets have standard configurations for 3/6/12 rectifier modules. Quantity of rectifiers, battery fuses, battery shelves, load distribution and many other features are configurable to match with requirements of the application.
